

COVID-19 Brief

coronavirus

Here is the brief for Tuesday 8 June 2021.

COVID-19 vaccination programme It is exactly six months since the first doses of COVID-19 vaccination were administered, starting with health & social care staff, before expanding out into a full public programme. Over the last six months a huge amount of work has been undertaken to identify and run mass vaccination clinics in Elgin, Peterhead, Fraserburgh, Macduff, Huntly, Inverurie, Stonehaven, Banchory, and at P&J Live in Aberdeen, to recruit and train the right staff, to offer community outreach and workplace clinics, and to speed up the delivery of the programme in Moray when case numbers there rose. The latest figures (below, from Public Health Scotland) show the progress that has been made from a standing start and so we say thank you to everyone involved; no matter how big (or small) your role, you have contributed to the success of this programme.

Grampian data Thank you for your patience with the delay in sharing local data, we are now able to present the figures for today and the previous three days. This also includes the 7-day rolling positivity rate. As a reminder, this rate is arrived at by dividing the number of positive tests in the past 7 days by the number of tests carried out in the past 7 days. Repeat tests are included in both categories.

The figure for the “daily number of new people tested” is only for the number of tests for people who have not been tested previously.

| | Daily number of new people tested | New cases in past 24 hrs | Daily no. of contacts isolated in past 24 hrs | Patients in hospital | Patients in ITU | Deaths in hospital |
|------------|-----------------------------------|--------------------------|---|----------------------|-----------------|--------------------|
| Sat 05/06 | 434 | 21 | 107 | 3 | 0 | 0 |
| Sun 06/06 | 367 | 31 | 114 | 5 | 0 | 0 |
| Mon 07/06 | 409 | 24 | 93 | 8 | 0 | 0 |
| Tues 08/06 | 357 | 24 | 54 | 8 | 0 | 0 |

378 avg daily tested last 3 days

Tests reported from Illuminate up to 3pm on 06/06/21

NB tests refreshed daily due to lag in reporting

No change from 07/06/21

Reported by Scottish Govt up to 8am today

Down 39 from 07/06/21

Reported from CMS up to 15:30 today

No change from 07/06/21

Confirmed patients from Trakcare according to new definitions from 15/9

No change from 07/06/21

Confirmed from Trakcare as per SG definitions - excludes patients who were +ve >28 days. ECMO patients included if flagged for COVID-19

Last recorded death 23/04

Confirmed from Trakcare

7 day rolling positivity rate on 06/6 1.06%

A national update is available on the [Public Health Scotland daily dashboard](#).

Fast Track Cities – Zero stigma, zero new HIV infections, zero AIDS related deaths In February 2020, Aberdeen City signed the Paris Declaration which pledges support to the Fast Track Cities (FTC) initiative as part of the global focus on Human Immunodeficiency Virus (HIV), prevention, diagnosis and treatment. The signing of this declaration indicates the commitment of Aberdeen City in zero stigma, zero new HIV infections and zero AIDS-related deaths by 2030.

The FTC steering group have worked to establish a strategic plan and wider partnership and the plan was recently endorsed by the Integration Joint Board. It is intended for the plan to be a working document and therefore has been updated to reflect the impact of COVID, as a result the FTC steering group would now like to undertake a wide consultation to help inform this work going forward.

This consultation is open from now until the 2nd of July. It is appreciated if you could therefore take a few minutes to complete this [consultation](#) and share the link to the consultation within your networks. Although this document reflects the commitment made by Aberdeen City, we hope in time Aberdeenshire and Moray will also join the Fast-Track Cities Initiative which will ensure that the Grampian is recognised as one and in the Northeast of Scotland we all support better prevention, diagnosis, treatment for HIV and helps work towards zero stigma.

Thank you for your support - The Fact Track Cities Group.

Project Wingman We would like to recognise the massive contribution from the Project Wingman team over the past year in five sites across NHS Grampian, the most recent lounge based at P&J Live (see picture below) where the team departed from yesterday. Some of the Project Wingman team are returning to their cabin crew and pilot roles on a full-time basis; we are delighted to say some have joined NHS Grampian on a more permanent basis in a number of roles.

Tune of the day We're feeling a little bit country today, thanks to the suggestion from Margo Urquhart (Support Manager, Women's Service) – it's [Up by Shania Twain](#). Margo says: "The first few lines sum up perfectly how I've been feeling recently...apart from wishing I could grow a beard, although my delightful kids would say I already have a moustache so I might as well have the beard to match!"

Get in touch! If you've got a question, an item to share with people working in health & social care, or just want to suggest a tune of the day, we want to hear from you! Drop us a line via gram.communications@nhs.scot.
